

2018

**Unfunded
Infrastructure
Report**

Projects by Type

All 55 unfunded projects were sorted into 11 different project types.

The most common type of unfunded project is surface transportation, representing projects improving or replacing streets, bridges, sidewalks, and any other transportation surface.

The highest combined cost type of unfunded projects were water projects, including sewer improvements and expansions, waterline improvements, and water tank and water system additions.

In order from most to least projects by type: surface transportation (16), drinking water (12), redevelopment (7), wastewater (6), broadband (6), stormwater (3), recreation (2), arts/culture (1), education (1), land acquisition (1), and public safety (1).

Identified Projects by Type

- Arts/Culture
- Education
- Recreation
- Surface Transportation
- Broadband
- Land Acquisition
- Redevelopment
- Wastewater
- Drinking Water
- Public Safety
- Stormwater

Projects by County

Buckeye Hills staff ascertained that approximately 50% of the 57 municipalities in our region currently participate in existing funding programs offered by our regional council.

In order from most to least projects by county: Perry (16), Morgan (8), Athens (8), Noble (5), Monroe (5), Meigs (5), Hocking (4), and Washington (4).

In order from highest to lowest unfunded project cost by county: Morgan (\$17.2M), Perry (\$15.1M), Meigs (\$14.3M), Noble (\$4.8M), Athens (\$3.1M), Washington (\$2.3M), Hocking (\$2.2M), and Monroe (\$1.4M)

Total Identified Projects

- Athens
- Hocking
- Meigs
- Monroe
- Morgan
- Noble
- Perry
- Washington
