# INTRODUCTION

### **INTRODUCTION**

The Buckeye Hills Regional Council region encompasses eight counties in Southeastern Ohio. This region is populated by approximately 260,000 residents, and spans 3,695 square miles. Buckeye Hills helps local communities work cooperatively to improve the region. A voluntary organization of local government political subdivisions, Buckeye Hills serves eight counties securing financial resources to translate ideas into action. (Athens, Hocking, Meigs, Monroe, Morgan, Noble, Perry & Washington)

Whether reaching out to the region's seniors in need of in-home assistance, providing communities with planning support, or serving as advocates on the state and national level, the professional staff at Buckeye Hills serves with dedication and compassion.

Since its inception, Buckeye Hills has secured over \$500 million for education, health care, infrastructure, training and social services programs in the region.

Buckeye Hills assists communities in identifying urgent needs and securing grant and loan dollars to improve infrastructure and the overall quality of life for residents. The staff often acts as 'adjunct staff' for communities in the District by providing technical assistance, grant writing, and project administration.

### **VISION STATEMENT**

The effective utilization of public and private resources for an improved quality of life for our constituents.

### **MISSION STATEMENT**

Buckeye Hills will improve the socioeconomic conditions of the region by promoting the interests and needs of our constituents to persons and agencies empowered to create positive change.

Since the program's inception as a pilot in 2012, Buckeye Hills has participated in the Regional Transportation Planning Organization (RTPO) program, in partnership with The Ohio Department of Transportation (ODOT). On January 27, 2016, Governor John Kasich, pursuant to United State Code, Title 23, Section 135 (m), officially designated Buckeye Hills as an Ohio RTPO.

In establishing the Regional Transportation Planning program, ODOT has recognized six rural multicounty planning agencies as Regional Transportation Planning Organizations (RTPOs). The goal of this program is to expand transportation planning activities in Ohio, giving local parties greater input on projects and issues related to transportation in their regions. During this program, ODOT and Ohio Metropolitan Planning Organizations (MPOs) have assisted the rural regions in developing comprehensive regional transportation plans while building overall transportation planning expertise.

### INTRODUCTION

Local participation is critical to the success of this program, and is at the center of the program as offered by ODOT. The Buckeye Hills Executive Committee serves as the RTPO Policy Committee. The Executive Committee is made up of public officials, private business representatives, and engaged citizens from across the region. The Executive Committee is charged with taking official action on all RTPO documents, policies, and other activities which require signatory approval.

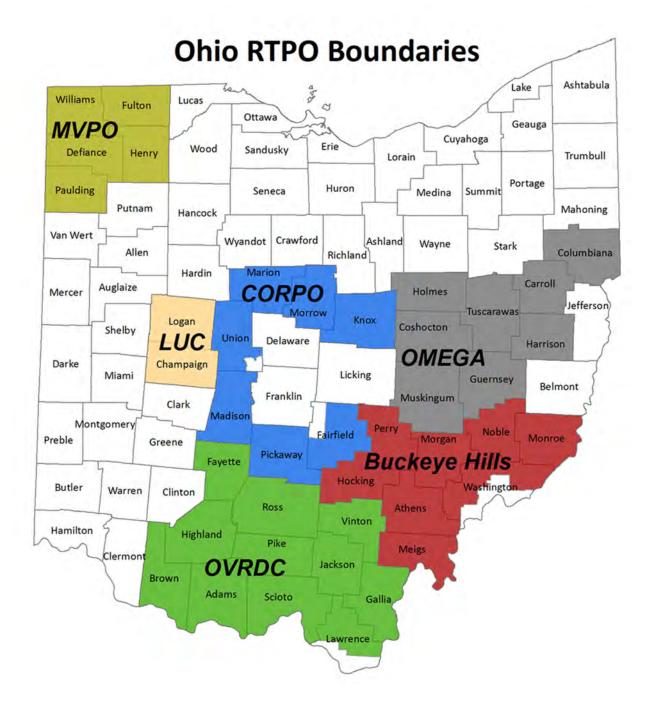

A Transportation Committee was formed to advise the Executive Committee on items related to transportation. The Transportation Committee is made up of individuals representing communities and organizations within the district that have an expressed interest in transportation matters facing the region. This committee includes representatives from neighborhood organizations, clubs and outdoor organizations, special interest groups, environmental groups, as well as individuals with specific transportation related expertise or professional experience. To provide further assistance, one sub-committee was formed to provide assistance on technical or engineering related matters to the Transportation Committee. The Technical Advisory Committee is made up of county engineers, city engineers, and other individuals with specific technical expertise or professional experience related to transportation matters.

The transportation planning boundaries in which Buckeye Hills conducts transportation planning processes includes Athens, Hocking, Meigs, Morgan, Monroe, Noble, Perry, and Washington counties (except Belpre, Dunham, Fearing, Marietta, Muskingum, Newport, and Warren Townships). Below is a map of the Buckeye Hills RTPO service region.

# INTRODUCTION

There are currently six RTPO's recognized by the State of Ohio. Besides Buckeye Hills, there is LUC Regional Planning Commission, Maumee Valley Planning Commission (MVPO), Ohio Valley Regional Development Commission (OVRDC), and Ohio Mid-Eastern Government Association (OMEGA) and the Central Ohio Rural Planning Organization (CORPO). Below is a map of the RTPO's and their respective service boundaries.

### **RTIP OVERVIEW**

### **RTIP OVERVIEW**

The RTIP is a four-year planning document developed to reflect the investment priorities of the Statewide Transportation Improvement Program (STIP) for the Buckeye Hills' region. This document also serves to reflect the continuing, cooperative planning effort undertaken by ODOT, Buckeye Hills, and the other RTPO partners to advance the transportation needs of the region. It is a comprehensive and financially-constrained listing of regional transportation projects scheduled for implementation within the next four years. The program of projects included in the RTIP maintains a balance of local and regional needs and includes projects from all modes of transportation including highways, transit, rail, bicycles and pedestrians.

The RTIP is developed on a biennial basis in conjunction with the STIP development process and consistent with the Buckeye Hills Comprehensive Long-Range Transportation Plan. During rural consultation, which is an important step of the STIP/RTIP development process, Buckeye Hills serves as the regional voice to coordinate and identify regional transportation needs for consideration of inclusion in the STIP and RTIP. Buckeye Hills continues the coordination with ODOT and MPOs within the region to provide a comprehensive RTIP document that is made available for public comment during the STIP/RTIP Public Involvement Period. Public comments are addressed and coordinated within the RTIP. The final RTIP is adopted by the Buckeye Hills Executive Board (RTPO Policy Committee) and then included in ODOT's STIP by reference.

Also included is a list of projects that have been identified by stakeholders as unfunded using current means. Should funding become available many of these projects can be reasonably expected to begin construction between 2021 and 2024.

# TRANSPORTATION PLAN SUMMARY

### TRANSPORTATION PLAN SUMMARY

Buckeye Hills has completed and adopted a regional transportation plan called the Comprehensive Long-Range Transportation Plan (LRTP) as of June 2015. The projects in the RTIP, listed in Chapter 4 and Appendices B and C, are consistent with the goals and objectives identified in the Long-Range Transportation Plan. A summary of the transportation plan findings is provided on the next page.

The LRTP captures a wide range of condition and analysis information regarding transportation assets and conditions in the region. The analysis includes sections on goals and objectives, existing conditions, future conditions, needs analysis, and general plan recommendations. A summary of the goals and objectives, regional trends, and plan recommendations is included below. To review the complete Long-Range Plan, please visit our website at http://buckeyehills.org/transportation-planning.

### **REGIONAL TRANSPORTATION GOALS AND OBJECTIVES**

Buckeye Hills staff worked closely with the Transportation Committee, local public officials, and residents of the region to craft a series of goals that took in to consideration the results of the analysis activities, was cognizant of public input, and consistent with MAP-21 policy objectives.

		Buckeye Hills RTPO IRTP Goals and Objectives
GOAL	OBJECTIVE	DESCRIPTION
#1	Maintain and Preserve the Region's Transportation Systems	Identify deficiencies and recommend improvements; Improve and maximize the life of systems; Increase public education opportunities; Encourage two-way reporting
#2	Enhance Transportation System Safety	Reduce collisions; Advocate safety measures; Improve driver awareness education
#3	Strengthen the Region's Economic Vitality	Connect transporation systems with economic assets; Strenthen global competiteveness, productivity and efficiency; Increase investment in freight, road, rail, and maritime projects
#4	Environmental Sustainability in Transportation Planning	Promote use of alternative modes; Develop and utilize bike and pedestrian facilities; Avoid unnecessary impacts
#5	Increase Mobility and Accessibility Opportunities	Encourage options for moving people and goods; Increase access to public transportation options; Establish additional public transportation assets
#6	Inhance Coordination and Connectivity of Transportation Systems	Ensure regional core systems connect facilities, economic assets, and Ohio's varied transportation networks; Strengthen mtermodal links; Coordinate outreach and communications

### **NEEDS AND PRIORITIES**

While investigating the transportation needs of the Buckeye Hills region, several current and future trends were identified; trends that will have impacts on the overall transportation system in the region. Possible solutions and recommendations to these impacts will be addressed in the Plan Recommendations section. Officials and residents of the region must continue to work together to

identify actions that will mitigate these impacts. Taking no action in the face of these trends could lead to serious consequences for the transportation assets in the district.

### **Population Decline and Aging**

The Buckeye Hills region is both decreasing in population and growing in age. As the rate of new residents to the region slows (both through births and in-migration), the impact of aging on existing residents increases. As it relates to transportation, the potential of fewer drivers on the road could signal a decrease in transportation funding generated through gasoline taxes and other applicable fees, while an aging population also could signify a greater need for transit services. Without expanding these services, accessibility to necessary services could become problematic for seniors who are unable or unwilling to operate a motor vehicle or otherwise impaired.

### **Employment and Economic Growth**

The outlook for job growth in the region over the next 25 years is generally positive, however the projected number of residents available in the local workforce to fill those new positions is not expected to increase. This could signify a rise in the net commuting into the region, as workers come to the Buckeye Hills region to work. If this proves true, a greater level of demand will be placed on the transportation system, specifically the highway network.

### Multi Modal Transportation System

It is expected that the Buckeye Hills region will continue to rely heavily on motor vehicles as the primary means for both commercial and personal travel. There are also indications that additional transportation options and linkages between existing modes are needed in the district. As the population of the region changes over time, reliance on transit and other public transportation is likely to grow.

The region is also rich with outdoor recreational resources, which will likely lead to a continued growth in walking and cycling activities. These activities are projected to grow both for recreation and as a mode of transportation.

As the economy of the region continues to expand to support new opportunities, it is clear that maritime and rail infrastructure requires increased focus in order to capitalize on those opportunities.

The need for overall coordination and connectivity of transportation resources will grow in importance for local governments and public agencies in region during the next 25 years. This will be especially true as available resources for transportation become increasingly scarce and weaker in buying power.

### Safety

Participants in the planning process have placed great emphasis on the fact efficient and effective transportation systems must also be safe. Cooperation and coordination between

# TRANSPORTATION PLAN SUMMARY

interested parties in the region can help reduce the number of deaths and injuries resulting from transportation related accidents. Increased input on the design and maintenance of transportation assets can help alleviate some safety concerns. It is also important to provide corresponding outreach and educational activities to encourage users to travel in a safe manner.

### **Preservation of Infrastructure**

Federal and state transportation budgets have been slowly dwindling, and are projected to continue this trend in to the foreseeable future. Faced with this reality, participants in this planning process have firmly stated that it is imperative to preserve the condition of existing highways, bridges, transit systems, multi-use paths, rails, and airports. ODOT has sponsored Transportation Opinion Surveys for residents in the region. Respondents overwhelmingly indicated that maintaining the existing transportation system should be a top priority for local officials.

One existing funding program which provides resources for transportation improvements in the Buckeye Hills region is the Ohio Public Works Program (OPWC) Local Transportation Improvement Program (LTIP). This program provides funding for basic local transportation primarily road and bridge rehabilitation (e.g. paving, guard rail installation). Buckeye Hills has served as the local liaison for this program since inception in the late 1980s. While this program has provided significant benefit to the region, there remains a significant unmet need for basic transportation infrastructure repair and maintenance. The eight counties combined had unmet needs of nearly \$13.2 million in the last five years from the OPWC program alone. Approximately \$100 million or more is needed to address the preservation of the infrastructure within the Buckeye Hills region.

### Funding

Potential funding for future transportation developments and improvements is becoming increasingly uncertain at both the state and federal level. The availability of funds and the method for raising those funds are unsteady at this point, and concentrated policy actions will be required to remedy these issues. Issues with gas tax collection at all levels is just one example of how federal issues are trickling down to have significant impacts on local transportation projects. If these issues remain unresolved, they may pose serious roadblocks to improving the transportation system in the Buckeye Hills region, and may hinder future economic growth in the area.

### PLAN RECOMMENDATIONS

Following the completion of the analysis and regional trends sections, a series of recommendations were offered. A summary of those recommendations is offered below.

# TRANSPORTATION PLAN SUMMARY

### Short Term Recommendations (within the next two years)

- Implement criteria and a prioritization process for funding future projects
- Develop a four-year Transportation Improvement Plan (TIP)
- Create a comprehensive regional transportation resource for stakeholders
- Create a coordinated transit plan for Meigs and Noble counties
- Develop and conduct Driver Awareness Campaigns
- Improve and iterate the Future Conditions Survey
- Coordinate transit stops near or around multi-use paths
- Pursue at least four safety studies for further consideration of ODOT safety funds
- Continue to educate government representatives and agencies on need for regional transportation system planning
- Develop and maintain databases and identify data gaps

### Long Term Recommendations (up to 2040)

- Pursue the development of a public port within the region
- Address the Top 25 safety locations and projects in the region
- Replace the majority of bridges over 100 years old
- Replace structurally deficient bridges near activity centers
- Create a Regional Coordinated Freight Plan
- Implementation of 286,000-pound railroad track capability
- Engage Federal officials on the advantage of upgrading locks and dams in the regions' areas on the Ohio River to further economic development
- Establish a fully regional coordinated transit plan, and increase operations
- Connect multi-use trails across the region

# PERFORMANCE MEASURES

### PERFORMANCE MEASURES

Buckeye Hills supports the efforts of ODOT in setting statewide goals for performance measures prescribed by the Fixing America's Surface Transportation (FAST) Act of 2015. These performance measures identify targets set by the state to increase the safety, reliability, and efficiency of the transportation networks throughout the state of Ohio. As an RTPO, Buckeye Hills was not required to adopt or set benchmarks for these performance measures, and instead chooses to support statewide efforts. National performance goals were established in the seven areas that follow:

- Safety
- Infrastructure Condition
- Congestion Reduction
- System Reliability
- Freight Movement & Economic Vitality
- Environmental Sustainability
- Reduced Project Delivery Delays

### **PROJECT INFORMATION**

There are specific federal and state requirements for projects to be included in the STIP and TIP documents. United States Department of Transportation requires all projects to be financed whole or in part with federal surface transportation funds, projects requiring a federal approval action, and other regionally significant projects to be included. All projects must also be consistent with Ohio's long-range transportation plan. Additional information may be found in <u>Title 23 Chapter 1</u> <u>Subchapter E Part 450</u> of the code of federal regulations.

The following sections provide information on the lists of projects to be implemented in some phase within the SFY 2021-2024 period. Also included in Section 3 below is a list of projects identified during Buckeye Hills' planning process as potential projects of interest for the region.

### STATEWIDE LINE ITEMS (SLI)/GROUPED PROJECTS

Projects not considered to be of appropriate scale for individual identification in a given program year may be grouped by category or program. These projects are grouped and identified in the STIP and TIPs as Statewide Line Items or SLIs. The projects utilizing SLIs are non-controversial in nature, have an air-quality status of exempt, and have a negligible environmental impact. Appendix B includes the Statewide Line Item (SLI) List which provides a definition of each SLI and the SLI Report which identifies the currently programmed projects utilizing SLIs in the STIP period. The SLI Report is a fluid document and is for informational purposes only. <u>Title 23 Chapter 1 Subchapter E Part 450</u> <u>Subpart B §450.218 (j)</u> may be referenced for the provision of grouped projects (SLI projects) in the STIP/RTIP as named by ODOT.

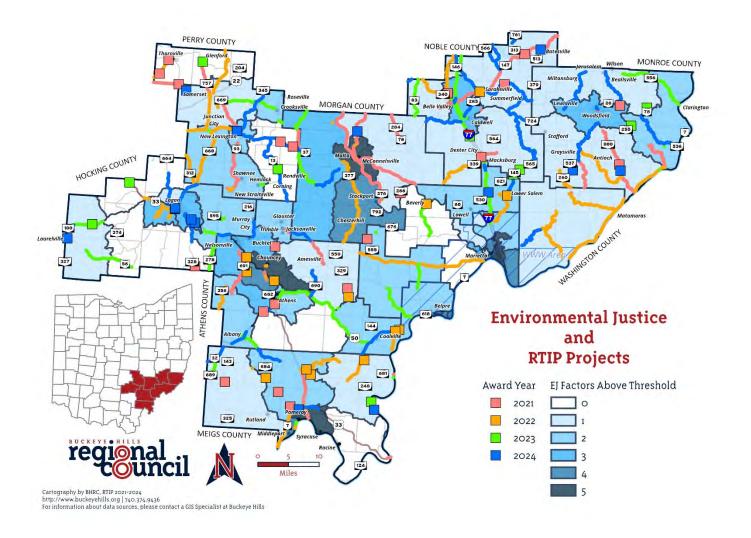

### **ENVIRONMENTAL JUSTICE**

Pursuant to the 1994 Executive order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, Buckeye Hills' RTIP ensures the fair treatment and meaningful involvement of people of all races, cultures, and income with respect to development, implementation and enforcement of environmental laws, regulations, programs, and policies. The public involvement activities Buckeye Hills undertakes, as well as our committee and outreach efforts, are attempts to reach these concentrations, when possible.

In order to help identify Environmental Justice factors and affected areas in the Buckeye Hills region, the following analysis was determined by using 2013-2017 ACS estimates provided by the US Census Bureau, Ohio County Indicators, published by the Ohio Development Services Agency in 2019, and the Centers for Disease Control's Social Vulnerability Index. Buckeye Hills identifies the required demographics of elderly, minority and in-poverty populations, as well as those individuals that are disabled and household without access to a personal vehicle. While these last two categories are not statutorily required, it is the belief of this agency that these hindrances must be examined as well.

- **Minorities:** The region's population is made up of only 6.0% minority populations, defined as all persons except those who defined themselves as white, non-Hispanic. The greatest concentrations of minority populations are in Athens and Morgan counties at 10.7% and 8.1% respectively.
- **Elderly:** Region residents over the age of 65 make up approximately 17.1% of the region's population. Noble County has the highest percentage at 25.1%.
- **Poverty:** Southeast Ohio has continually had one of state's highest rates of poverty. In ACS 2017 estimates, BHRC counties averaged 19.5% of individuals below the poverty level significantly higher than the 14.9% experienced by the state at-large. Athens County comes in with the highest rate of 30.2%.
- **Disability:** Of the civilian noninstitutionalized population in the BHRC region, 18.6% are estimated to have a disability. Meigs has the highest percentage with 22.7% of the population estimated to have a disability.
- Zero-Car Households: In BHRC it is estimated that 6.8% of all households have no car available. Monroe and Athens were the counties with the highest percentage, at 8.5% and 8% respectively.

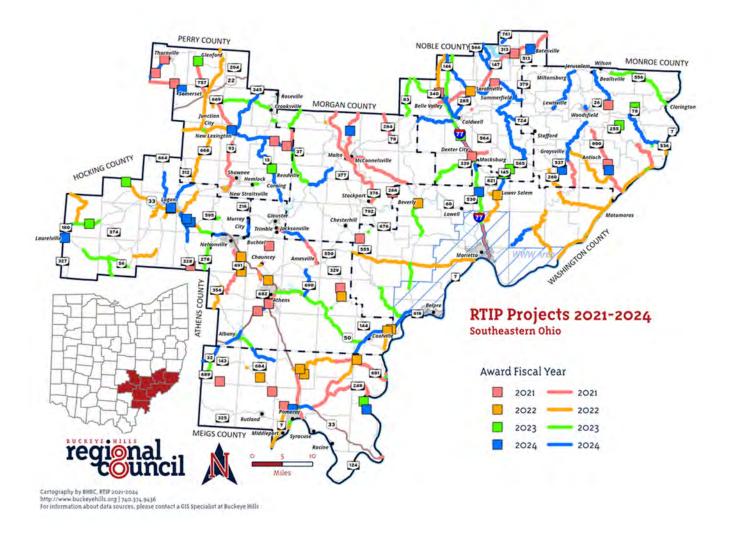

The majority of projects for the next four years are aligned with Buckeye Hills' RTPO goal of preservation and maintenance. Paving and bridge replacement or rehabilitation makes up a large portion of identified RTIP projects. The projects are consistent with the Environmental Justice factors, especially when compared to populations. The distribution of the preservation projects does not adversely impact or avoid any Environment Justice populations. Below is a map of the identified environmental justice population focus areas (Census Tracts in which a given population concentration was higher than the regional average) and their relation to planned projects.

### **PROJECT LIST**

Included in this section are projects programmed by ODOT for some phase of implementation during the SFY 2021-2024 STIP and TIP period that do not qualify for SLI usage. These projects must follow the STIP amendment and modification procedures which require federal review and approval. Appendix C provides a listing of the projects.

As most of the activities in the previous RTIP were maintenance and repair activities, there were not many major projects in the Buckeye Hills region during this RTIP cycle. One project, nearing completion, that has had a significant impact on a community is the intersection upgrades in McConnelsville and Malta, installing roundabouts on either side of the State Route 78 bridge. There were no significant delays in prior TIP projects.

### **UNFUNDED RTPO PROJECTS**

During the development of the regional transportation plan, the below projects were identified by Buckeye Hills as possible future transportation improvements for the region. The identified projects are un-programmed, unfunded, and not scheduled for any phase implementation. This list is included for informational purposes only. Buckeye Hills may pursue a project for programming in the future if funding becomes available.

#### **Buckeye Hills Unfunded Projects**

CNTY	Name	<b>Description</b> (Two sentences, max.)	Est. Cost	Improvement Type	Safety?	Federal Aid Network?	Network

### PUBLIC INVOLVEMENT

### PUBLIC INVOLVEMENT

A key component of the RTIP development process is to foster a proactive public involvement review and comment process associated with the program. Public review was conducted following the adoption of these public involvement policies. The public involvement schedule of activities was also concurrent with ODOT's STIP public involvement schedule. Significant comments received during public involvement necessitate written responses. The RTIP thoroughly documented the public involvement schedule, process, and outcomes. All documented materials on the schedule, comments received, responses given, and the complete process are located in Appendix E.

Additionally, Buckeye Hills made resources regarding the project list and locations available online at <u>http://www.buckeyehills.org/rtip</u>. Comments could be submitted through that portal as well, during the March 30 through April 10 public involvement period.

### PUBLIC INVOLVEMENT SCHEDULE

Due to the global pandemic of COVID-19 and Governor DeWine's order to limit groups to ten or less, all of our RTIP public involvement will be performed online for this cycle. Information regarding the RTIP process is available at <a href="http://www.buckeyehills.org/rtip">http://www.buckeyehills.org/rtip</a>. Links for the online meetings will be available at <a href="http://www.buckeyehills.org/rtip">http://www.buckeyehills.org/rtip</a>. Links for the online meetings will be available at <a href="http://www.buckeyehills.org/rtip">http://www.buckeyehills.org/rtip</a>. Links for the online meetings will be available at <a href="http://www.buckeyehills.org/rtip">http://www.buckeyehills.org/rtip</a>. Links for the online meetings will be available at that location as well. It is still the goal of Buckeye Hills to target meetings toward specific counties, and the dates below reflect that. Following ODOT's guidance, comments can be made between the dates of March 30, 2020 and April 10, 2020.

#### Morgan and Washington Counties

March 31, 2020 6pm – 7pm

#### **Hocking and Perry Counties**

April 7, 2020 6pm – 7pm

#### Athens and Meigs Counties

April 2, 2020 6pm – 7pm

#### Monroe and Noble Counties

April 9, 2020 6pm – 7pm

### FISCAL CONSTRAINT

### **HIGHWAY ESTIMATES**

For a project to be included in the TIP and STIP per federal regulations, reasonable fiscal constraint must be maintained. Fiscal constraint is maintained by keeping estimated transportation improvements within identified budgets. Since Buckeye Hills does not currently receive suballocated funding, the ODOT STIP addresses fiscal constraint for this program.

Appendix A Definitions, Abbreviations, & Funding Types

### DEFINITIONS, ABBREVIATIONS, & FUNDING TYPES

The following definitions and abbreviations are used throughout the project listings to describe various characteristics of the project, including location, type, funding, phase, etc.

	RTIP Abbreviations and Descriptions
Abbreviation	Description
Map No.	Number identifying project on map.
PID No.	The Project Identification Number assigned to a project by ODOT.
Co-Rte-Section	The official project title assigned by ODOT consisting of a county code, route, and section mileage designations, where applicable. Project phase or segment identification may also be indicated
Length Location and Termini	Contains the name of the city, township, or village in which the project begins. Termini are described in terms of prominent instersecting streets or county lines
Type of Work	A brief description of the type of work to be performed.
FY	State Fiscal Year (FY 2021 begins on July 1, 2020)
Total Cost (000's)	Total cost of all project phases in current dollars and rounded off to the nearest thousands.
Project Sponsor	The unit of government or agency that initiated the project, implementation responsibility and assigned local share.
Phase	P — Preliminary Engineering R — Right-of-Way Purchase C — Construction

	RTIP Funding Type Abbreviations and Descriptions									
Abbreviation		Abbreviation								
BR	Bridge Replacement/Rehabilitation	NHS	National Highway System							
CMAQ	Congestion Mitigation/Air Quality	NPS	National Park System							
DISC	Discretionary Funding/High Priority	OTC	Ohio Tumpike Commission							
HSIP	Highway Safety Improvement Program	SRTS	Safe Routes to School							
IM	Interstate Maintenance	STP	Surface Transportation Block Grant Program							
LOCAL	Local Funding	STATE	State/ODOT Funding							
NHPP	National Highway Performance Program	TAP	Transportation Alternatives Program							

Appendix B SLI Report and Individual Project Listing

### **SLI REPORT**

Both highway and transit projects can be grouped into larger line items. Below is the highway and transit tables.

Washington County, Ohio

Appendix E Public Involvement Documentation

#### PUBLIC INVOLVEMENT DOCUMENTATION

Due to the COVID-19 pandemic, and Governor DeWine's restriction on meetings of ten or more people, RTIP public involvement was moved entirely online. All documentation was captured in a webpage located at <u>https://www.buckeyehills.org/rtip</u>. Screenshots of that page can be seen below.

Four meetings were scheduled, focusing on 2 counties each. Meetings could be attended via a URL and via a phone. Two people attended the first meeting covering Washington and Morgan Counties, but one only provided a first name. Except Buckeye Hills staff, no one attended the subsequent meetings. No comments were received by Buckeye Hills. One comment was received by ODOT. That comment and the response from ODOT can be seen over the next pages. From: Camden, Thomas

Subject: Stop-Sign replacement - Athens County
Importance: High

Ms. Cash,

As the Project Manager for the sign replacement project in Athens County, I was asked to respond to your inquiry.

The Ohio Department of Transportation (ODOT) publishes what is called the *Ohio Manual of Traffic Control Devices* (OMUTCD). It covers uniform application of signs, signals, and markings in the state of Ohio. This manual is based upon the national *Manual of Uniform Traffic Control Devices* (MUTCD) published by the Federal Highway Administration. All states are to establish traffic standards that are in compliance with this Federal manual, and the OMUTCD satisfies this requirement while also adding standards that are specific to Ohio.

A little over 20 years ago, a section was published in the national MUTCD and, subsequently, the OMUTCD that stated all transportation agencies were required to use an assessment or management method designed to maintain sign retroreflectivity at or above certain levels. Retroreflectivity is the "brightness" of a sign that a driver sees at night. In lieu of checking the retroreflectivity values of each and every sign on the state highway system every year to determine the retroreflectivity values, ODOT decided on a management method whereby the signs would be replaced in a systematic way based on the manufacturer's guaranteed minimum retroreflectivity values at a certain age. ODOT developed a policy that strives to replace all of the signs on the state highway system every 15-20 years. The first round of replacements in District 10 began in 2001 and was completed around 2010, and we are now in our second round of systematic sign replacements. District 10 is comprised of nine southeastern Ohio counties. Sign replacements in Hocking and Washington counties have already been completed. Athens and Vinton county sign replacements are underway now. The remaining counties in District 10 will have their signs replaced within the next four to five years.

When it comes to highways, it is true that budgets are always a concern. ODOT tries to do as much as they can with the funding they have to work with. Like most state transportation departments, ODOT treats the highways like a system, where each part, whether it be bridges, roads, or signs, work together to provide a safe and effective transportation network.

Signs play an important role in the system by providing information to drivers so they can reach their destinations, gain knowledge of their location, and, in the case of regulatory signs (e.g., a "STOP" sign), be made aware of what a driver is legally required to de Although a sign may look OK during the daylight, the retroreflectivity (i.e., the light from the headlights that shine back to the driver) at night may not be adequate. The retroreflective sheeting of a sign degrades over time due to ultraviolet light exposure and environmental contamination. Sheeting manufacturers have tested and determined the typical degradation rates down to a minimally acceptable level of retroreflectivity (as measured by a retroreflectometer). This knowledge is what led ODOT to use 15-20 years as the systematic sign replacement cycle. It is actually more cost effective to perform a blanket replacement than to spend the resources to check every sign to see if the retroreflectivity number is above the minimum threshold.

I apologize for the long-winded preface, but I thought a background explanation of why ODOT is doing this work would be helpful. Specifically, you asked why money was being spent to replace a "STOP" sign that wasn't very old. Some signs that aren't very old may get replaced as part of this systematic replacement program. This falls back to the most cost effective way to reach our goal of having signs with adequate retroreflectivity that satisfy the FHWA requirement. Having to go back and replace signs along a route at staggered times would be more costly than just replacing all of them at the same time. In the overall scheme, these newer signs make up only a small fraction of the total older signs that will get replaced.

Thank you for the opportunity to respond. If you have any further questions, please feel free to contact me.

Thomas Camden, P.E. District 10 Studies Supervisor Ohio Department of Transportation, District 10 338 Muskingum Dr., Marietta, OH 45750 740-568-3903

Hi, Natasha.

Why is ODOT planning to waste my tax dollars to replace a nearly-new STOP sign at the corner of my property, in The Plains, OH, where Rte 682 meets E. Third Street? I can only imagine how many hundreds of signs are being replaced frivolously across the state, instead of putting money where it is truly needed. I can't imagine our governor would be happy if he were to hear about it....

Please notify me as to when these replacements in The Plains and elsewhere will be placed under review for reconsideration.

Thanks in advance for your attention to this matter.

Beki Cash 33 S. Plains Rd (Rte. 682) The Plains, OH 45780

# Appendix F Resolution

### RESOLUTION

Following the completion of the public involvement process, the Buckeye Hills Executive Committee approved the FY 2021-2024 Regional Transportation Improvement Program through Resolution #2020/06-03. The resolution confirms that all programmed projects on the RTIP align with the regional transportation plan and certifies that all applicable federal regulations were followed throughout the RTIP development process. A copy of the signed resolution is located on the next page.

## ADOPTING THE SFY2021-2024 REGIONAL TRANSPORTATION IMPROVEMENT PLAN

Resolution #2020/06-03

**WHEREAS**, the Buckeye Hills Regional Council is designated as the Regional Transportation Planning Organization (RTPO) by the Governor acting through the Ohio Department of Transportation in cooperation with locally elected officials for Athens, Hocking, Meigs, Monroe, Morgan, Noble, Perry, and Washington Counties; and

**WHEREAS**, the Buckeye Hills' Executive Board serves as the policy committee through which local governments guide the RTPO's transportation planning process for Southeastern Ohio; and

**WHEREAS**, federal and state directives provide for RTPO's to develop a Regional Transportation Improvement Program (RTIP) in cooperation with state and local officials; regional and local transit operators; grant recipients under sections of Title 49, U.S.C., and other affected transportation and regional planning and implementing agencies; and,

WHEREAS, the Buckeye Hills' SFY 2021-2024 TIP is consistent with the 2015-2040 Long Range Transportation Plan; and,

WHEREAS, the Buckeye Hills' RTIP is fiscally constrained; and,

**WHEREAS**, the Buckeye Hills' RTIP was developed, reviewed, and found to be consistent with the Public Participation Plan and has been reviewed and accepted by the Buckeye Hills Transportation Sub-Committee; and,

#### NOW THEREFORE BE IT RESOLVED,

- 1. The Buckeye Hills Regional Council Executive Board adopts the SFY 2021-2024 Regional Transportation Improvement Program.
- 2. This Committee affirms the public had adequate opportunity to comment on the Buckeye Hills SFY 2021-2024 RTIP.
- 3. This Committee approves submission of the Buckeye Hills RTIP to the Ohio Department of Transportation, for inclusion in the Ohio SFY 2021-2024 Statewide Transportation Improvement Program.
- 4. The Rural Consultation Procedures will be followed to address all changes to the Buckeye Hills SFY 2021-2024 RTIP.

Passed on this fifth day of June 2020.

Ron Moore, President

Lenny Eliason, Vice President
